

Statement Regarding Rice Protein and Melamine

Since 2008 when there was a discovery of melamine contamination in some rice protein, we periodically have our Rice Protein tested for melamine by an independent laboratory. Following is a copy of the most recent lab test. Our Rice Protein is tested down to 1 part per million, and none has ever been detected.

NutriBiotic has never been under investigation by the FDA for melamine contamination. We choose to test our Rice Protein for consumer confidence—to assure our customers our Rice Protein is free of melamine.

We have many customers with severe allergies who use our Rice Protein, and we understand the importance of making a very clean, pure product. NutriBiotic has been the leader in the distribution of enzymatically processed Rice Protein for over 30 years. We remain committed to providing the best quality Rice Protein and nutritional products available. Good health is our top priority.
